

REVANESSE® VERSA™

FOR THOSE
WHO

Expect the Best

VERSA™

For those who are looking to take control of the signs of aging, Revanesse® Versa™ is a multi-purpose dermal filler that leverages state of the art production methods, optimal ingredients and rigorous quality testing to provide exceptional results. Revanesse® is tried and tested, with over 1 million syringes used worldwide since 2002.

The Versa™ Difference

NATURAL & LONG LASTING RESULTS

Our advanced wet milling technology and proprietary formula make our particles strikingly spherical and uniform, providing optimal smoothness and volume. Our spherical particle is easily accepted by the body and breaks down slowly over time. Versa™ uses premium quality HA with a high molecular weight.

LESS DOWNTIME In a recent study another popular (HA) dermal filler was shown to produce swelling 24% more often than Versa™. Our lower rate of swelling means many patients are able to get back to their lives almost immediately after the treatment.

PRECISE APPLICATION The Versa™ formula is designed to be balanced with the water content of natural skin tissue. This means our treatment doesn't release or absorb surrounding water and minimizes concern of over or under treatment.

Small Batch Quality & Freshness

RIGOROUS QUALITY STANDARDS

- Extensive tests are performed on all of the raw materials
- Strict controls are used during the manufacturing process
- Every syringe is individually inspected

DESIGNED FOR SAFETY

- Completely free of all animal products
- Biocompatible and biodegradable formula breaks down naturally in the body over time
- Over 1 million syringes used with zero reported incidences of patients developing nodules or granulomas

FRESHNESS GUARANTEE

- Produced in small batches to ensure that our product is always delivered fresh
