

*WhisperPeel gently and effectively reverses signs of aging and photodamaged skin.*

- Smooth fine lines & wrinkles
- Improve skin texture
- Homogenize skin-tone and color
- Repair moderate scar damage
- Reduce pore size

A pure beam of light safely and gently removes the outer layers of damaged skin.

Over the next few days, old skin peels away.

As signs of the peel fade, your skin looks radiant and feels refreshed.

## WHISPER<sup>NG</sup>

"To be honest, I was very nervous about the treatment before it began. But once it started I was fine. It didn't hurt at all and I was back at work the next day. My skin looks and feels great."

*D.A. Dallas, Texas*

## WHISPER<sup>NG</sup>

*Let time march on...  
You're ready for it.*

**LASER** RADIANCY™

Time continues to move forward and we wouldn't have it any other way. What we would change is its footprint. Together with stress and our natural environment, time leaves a mark. Now, there is a safe and effective way to retrace and soften time's footprint.

## WhisperPeel

Refresh • Revive • Rejuvenate

Using patented Extended Ablation Technology™, the Whisper<sup>NG</sup> laser offers a gentle peeling procedure that yields noticeable and immediate results. WhisperPeel refreshes the skin on your face, neck and back of hands for noticeable softening of fine lines, wrinkles, mild facial scars and discoloration.

Precisely and painlessly, the WhisperPeel removes the upper layers of the epidermis, peeling away aged and sun-damaged tissue to reveal fresh, new skin.

*It's not what they say...  
It's what they whisper...*

### 1-2-3

With today's full, busy lives, it's difficult to strike a workable balance between career, social obligations and personal time. No matter how much we may want to do something about our skin, finding the time for rejuvenation procedures that require numerous sessions or long recoveries can be nearly impossible.

Made to fit your lifestyle, WhisperPeel is unlike anything else. You can opt for a single treatment or series of treatments depending on your skin condition. A complete facial takes only 15-30 minutes with no anesthesia and no downtime. After treatment the skin will look and feel like a mild sunburn and can be covered with makeup the next day.

### and you're ready for the world

After a WhisperPeel, you can immediately return to your regular routine. Within 3 days, your skin will begin to peel and within 5-10 days, depending on the intensity of the peel, all signs of the procedure will have vanished, leaving your skin looking and feeling smoother, tighter and completely refreshed.
